Dear

As part of my continued professional development, I am requesting your support to enroll in *The Counselors' Guide to the Student Athlete-Advising Process*. This e-learning course:

- Includes a summary of the unique characteristics and requirements of the primary collegiate athletics monitoring organizations (i.e., NCAA, NAIA, NJCAA).
- Explains the eligibility requirements for each level of participation.
- Demonstrates the process of planning for—and later documenting—eligibility.
- Explores the advising considerations unique to student-athletes.
- Outlines the often-confusing admission, decision, and committing process.

Completing this course will improve my ability to advise and assist student-athletes and their parents throughout the college search process. It will help me recommend proper coursework to ensure eligibility, clarify ambiguous offers, and present a broader range of options to any student who wishes to pursue athletics in college.

Thank you for your consideration.

Sincerely,
